Art Unit: 1711

1. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within line 4 of claim 1, applicants have failed to specify the type of percent (weight, mole, volume) and the basis for the percent. Is the percent based on the composition or on one of the components? Similarly, the basis has not been set forth for the mole percent of claims 6 and 7.

Within claim 4, the recitation of "about" with the carbon atom number is improper, because it cannot be determined with certainty exactly what compounds are encompassed by the claim. For example, does 12 carbon atoms satisfy the "about 10" language?

Within claim 8, it is unclear what constitutes an appropriate catalyst.

2. Claim 17 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants have failed to set forth what compounds are encompassed by the language, "their derivatives". In the absence of such guidance, it cannot be determined what derivatives are suitable solvents or what characteristics determine if a compound qualifies as a derivative.
